OUR SOLUTION AND ITS VALUE PROPOSITION

*Filtering- purpose to fill the missing values.

*Conditional formatting- blank values.

*Using- Pivot table and chart.

Dataset Description

- Employee data set- Kaggle

There are 26 features The important ten features are,

- Employment ID
- First Name
- Last Name
- Gender
- Employee Type
- Employee Classification
- Current employee score
- Employee ratings
- Business units

THE "WOW" IN OUR SOLUTION

- Performance Level– These include the categories such as Levels in very high, high, medium, low, etc...

MODELLING

The modelling in this employee performance analysis project includes the following:

- *Data collection
- *Data cleaning
- *Results
- *Pivot table
- *Chart

RESULTS

CONCLUSION

The conclusion is the employee data analysis reveals the key insights in workforce performance and areas needed for improvement. The effective data analysis provides a foundation for the improvised planning and operational developments, which leads to a motivated and productive workforce environment.
